Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. This is a first office action in response to application filed, with the above serial number, on 22 July 2003 in which claims 1-20 are presented for examination. Claims 1-20 are therefore pending in the application.

Drawings

2. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference character "134, 140, 120, 42, 70, etc" has been used to designate different items. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 3 recites the limitation "the media delivery system" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 1-20 are rejected under 35 U.S.C. 102(e) as being anticipated by Reisman (hereinafter "Reisman", 6,658,464).

As per Claim 1, Reisman teaches a computer-implemented local resource access system, comprising:

an initiating program having an instruction that generates a request for access to a resource, the request including a token and having the form of a hyperlink (at least col. 36, lines 22-67; browser hyperlink for local content); and

a translator program that receives the access request from the initiating program, the translator program further comprising instructions that generate a return token in response to the access request and instruction that return the return token to the initiating program, the return token further comprising a hyperlink containing a path to

Art Unit: 2157

the local resource (at least col. 36 line 22 – col. 37 line 32; col. 43, lines 12-60; link interceptor/ translator .

As per Claim 2. The system of claim 1, wherein the initiating program further comprises an instruction that receives the return token and an instruction that launches an application to execute the local resource pointed to by the return token (at least col. 36 line 22 – col. 37 line 48; col. 43, lines 25-47; eg. completion of calling link).

As per Claim 3. The system of claim 1, wherein the translator program further comprises a local application that is part of the media delivery system (at least col. 36 line 22 – col. 37 line 48; col. 43, lines 12-60).

As per Claim 4. The system of claim 3, wherein the translator program further comprises a local server that is part of a media delivery system (at least col. 36 line 22 – col. 37 line 48; col. 43, lines 12-60; server).

As per Claim 5. The system of claim 1, wherein the translator program further comprises a web page plug-in and wherein the initiating program further comprises a web page (at least col. 36 line 22 – col. 37 line 32; col. 43, lines 12-60; col. 44, lines 1-19; plugin, web pages).

As per Claim 6. The system of claim 1, wherein the initiating program further comprises an e-mail client application (at least col. 52, lines 33-67; email).

As per Claim 7. The system of claim 1, wherein the initiating program further comprises a messaging client application (at least col. 52, lines 33-67; email).

Art Unit: 2157

As per Claim 8. The system of claim 1, wherein the translator program further comprises an instruction that applies a network security policy to the return token wherein a validated return token is returned to the initiating program if the network security policy is satisfied (at least col. 44, lines 20-37; proxy server for security, firewall).

As per Claim 9. The system of claim 8, wherein the network security policy returns an error report if the network security policy is not satisfied (at least col. 44, lines 20-37; proxy server for security, firewall).

As per Claim 10. The system of claim 5, wherein the translator program further comprises an instruction that applies a network security policy to the return token wherein a validated return token is returned to the initiating program if the network security policy is satisfied (at least col. 44, lines 20-37; proxy server for security, firewall).

As per Claim 11. The system of claim 10, wherein the network security policy returns an error report if the network security policy is not satisfied (at least col. 44, lines 20-37; proxy server for security, firewall).

As per Claim 12. The system of claim 10, wherein the initiating program further comprises a java script that generates a hyperlink to the local resource if the validated return token is returned (at least col. 39, lines 30-48; col. 37, lines 1-48; java).

As per Claim 13. The system of claim 1, wherein the return token generation instruction further comprises an instruction for determining the type of hyperlink to be sent to the

Art Unit: 2157

initiating program (at least col. 36 line 22 – col. 37 line 32; col. 43, lines 12-60; eg. filename).

As per Claim 14. The system of claim 13, wherein the type of hyperlink comprises one of a localhost link, a loopback link, a file link and a protocol link (at least col. 36 line 22 – col. 37 line 32; col. 43, lines 12-60; col. 45 line 65 – col. 46 line 24).

Claims 15-20 do not substantially add or define any additional limitations over claims 1-14 and therefore are rejected for similar reasons.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Simpson et al, Bellotti et al, and Beged-Dov et al are cited for disclosing pertinent information related to the claimed invention. Applicants are requested to consider the prior art reference for relevant teachings when responding to this office action.
